

From Egypt

理学研究科留学生

アリア アダム

Alia Adam

EL SALAM ALAEKOM 今日は!

My name is Alia Adam. I came from Egypt. Egypt is the english name and the arabic name is "Misr". In Egypt, I live in Cairo very close to my El Azhar university. This university is the oldest university in Egypt. It was built more than hundred years ago. It belongs to very famous and old mosque in Egypt named El Azhar mosque. Anciently, this university provided only for the Islamic religion subjects but recently it start to have the other subjects like science, medicine, engineering and others besides the religion subjects also. I came from this university to Hiroshima university three years ago, and now I am in the third grade of doctor course.

Here in Hiroshima, I live with my husband and my 2 years old son Marawan. My husband is studying also in Hiroshima university, faculty of engineering in Saijyo campus, so he go and back every day from Saijyo. Every day I take Marawan to the nursery garden from 8:00 to 18:00 PM. After finishing my study in the faculty, I have to start another work in my house, washing cloths, preparing sup and many other duty. So, as you see I am quite busy in my day life.

Last January, I went back to Egypt and after two weeks Professor Fujiwara and Dr. Sakurai of my Faculty of Science joined me to attend the international Conference which held in Cairo between 14-24 of January. I was so happy with these company because this is the first time for both of them to visit Egypt. Dur-

ing this time of the year, the weather in Egypt is so nice, it is the winter but not so cold winter like here in Hiroshima. The sun shine most of the day and you just feel slightly cold during the night. No snowing at all, few and separated rainy days. It was good chance for me to take my professors in sight seeing trip around Cairo. We went together to the pyramids, Salah El Dyen Castle and around the very old Cairo area. We spent a very good time together and the time was not enough to go outside Cairo. My professor promises me to visit Egypt once more but only for sight seeing trip so that I can accompany them to upper Egypt where the ancient Egyptian people come from.

I think all of you have not much knowlede about Egypt. If some one is intersted to know some knowledge about Egypt, I will be glad to answer any question about my lovely and dear Egypt.
